

Geberit AquaClean
The WC that cleans you with water.

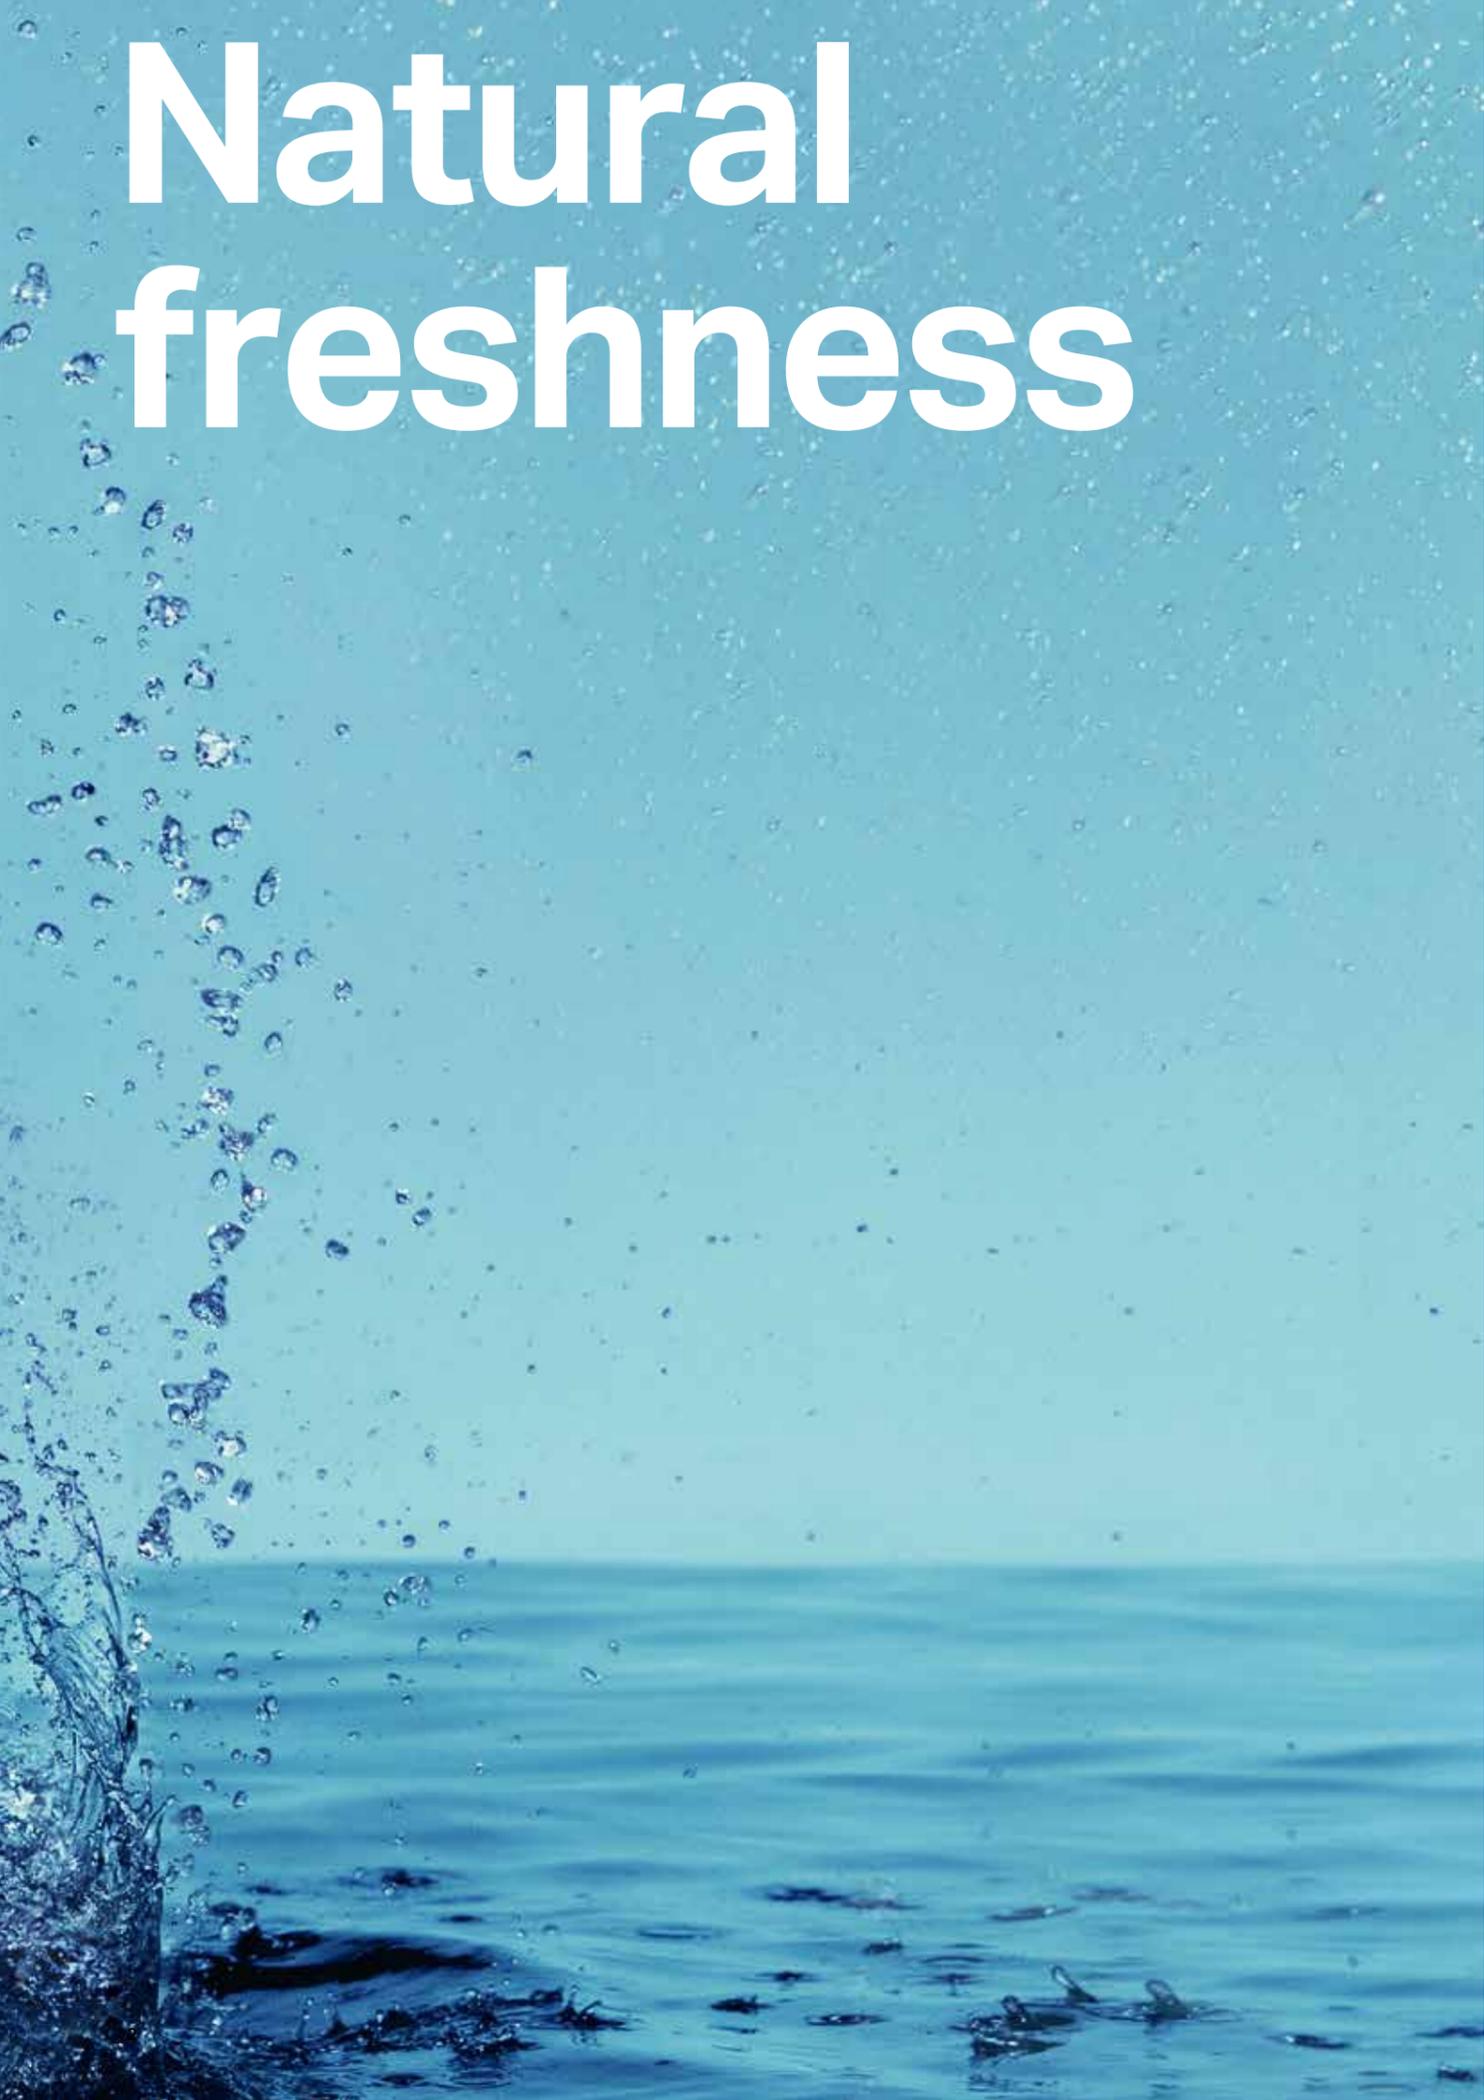

■ GEBERIT

Modern well- being

|  Water®

Natural freshness

Experience the Geberit AquaClean feeling.

Water is an integral part of daily personal hygiene. It cleans, refreshes and brings a feeling of well-being. In many cultures, it has long been natural to clean oneself with water after using the toilet.

And in the UK, more and more people are being won over by gentle, natural toilet hygiene that uses water instead of paper. Geberit AquaClean offers you this well-being experience at the touch of a button – an experience that is beneficial, thorough and unique. Discover the WC that cleans you with water and enjoy the feeling of absolute freshness and cleanliness all day long.

Cleanliness at the touch of a button 8

Geberit has spent the past 35 years fine-tuning the shower function and the shower spray – the centrepiece of any shower toilet – to absolute perfection.

Geberit AquaClean Sela 16

Created by designer and architect Matteo Thun, the Geberit AquaClean Sela fits into virtually any bathroom environment thanks to its clean design.

Geberit AquaClean Mera 12

The new Geberit AquaClean Mera – a masterpiece of function and design, ready for you to discover.

Always a perfect match 20

Whether you are having a brand new bathroom designed or renovating an existing one, Geberit AquaClean shower toilets can be combined with all Geberit installation and flushing systems.

Why choose a shower toilet?

Because only water leaves you really clean.

Washing your hands with just paper and wet wipes or even rubbing yourself clean instead of taking a shower – most people in central Europe would probably never consider doing either of these things unless they happened to be trekking across a desert. Taking a shower is simply part of our daily life. And let's be honest, do you really feel clean after wiping yourself off with toilet paper?

The idea of cleaning sensitive, intimate parts of the body with water is nothing new, which is why in many countries you will often find a bidet or a water hose next to the WC.

Geberit's shower toilets cleverly combine the functionality of a WC and a bidet, allowing you to stay sitting comfortably after using the toilet and enjoy a feeling of freshness and cleanliness at the touch of a button. What's more, thanks to their perfect blend of design and technology, Geberit AquaClean shower toilets do not take up any more space than conventional WCs.

Cleanliness at the touch of a button.

Experience that freshly showered feeling every time.

Geberit AquaClean shower toilets clean you gently with water – which is more hygienic than using paper and quicker than using a bidet. Designed especially with this in mind, Geberit AquaClean shower toilets leave you feeling freshly showered after every visit to the WC.

Clean and tidy

At first glance, modern shower toilets look just like any conventional WC. That is because the spray arm is hidden away in a well-protected position when it is not in use. The spray nozzle is automatically rinsed with fresh water before and after every use, so it is always kept clean.

Starting the shower function

The shower function is activated by pressing a button. Only at this point does the spray arm extend diagonally forward from its default position, thus keeping the spray nozzle clean. A few seconds later, you will feel the pleasant sensation of a jet of water at body temperature.

Adjusting the shower spray

If you feel that the shower spray is too weak or too strong for you, you can adjust the intensity of the spray of water to suit your personal preferences. Of course, you can switch the shower function off at any time, but it can be experienced for a full 15 to 20 seconds. After all, the shower function uses a lot less water than you might think.

Geberit has spent the past 35 years continuously fine-tuning the shower function and spray – the centrepiece of any shower toilet – to absolute perfection. At the same time, we have also invested a great deal of effort and expertise into developing the innovative technology and comfort functions that make our shower toilets so special. All AquaClean shower toilets offer highly sophisticated design combined with superb comfort and convenience. Depending on the model a host of features make for a truly pampering experience.

Absolute cleanliness

The shower spray moves smoothly backwards and forwards to leave you with an exceptional feeling of cleanliness. The position of the spray arm and the intensity of the spray can be individually adjusted.

Gentle intimate hygiene

Many women appreciate the benefits of a gentle lady wash. After all, there is no better way to clean sensitive intimate areas than with pure water.

No unpleasant odours

Odour extraction does exactly what its name suggests: it gets rid of unpleasant odours. This function is activated automatically as soon as you sit on the shower toilet.

Gentle drying

Take advantage of the gentle flow of air provided by the integrated warm air dryer.

Top marks for an ergonomic seat design

The high quality ergonomic WC seat features integrated WC seat heating. This is triggered by the proximity sensor and warms the seat up in no time.

No rim and very little noise

The TurboFlush technology developed by Geberit makes it possible to flush out the toilet extremely thoroughly yet also very quietly, thanks to the unique inner geometry of the rimless ceramic pan.

A guiding light during the night

A discreet LED light for orientation at night is activated by the proximity sensor. There are seven different colours and five levels of brightness to choose from.

Utterly user-oriented

Thanks to the proximity sensor, functions such as the water heating system, the WC seat heating or the orientation light are switched on automatically as soon as you approach the toilet.

Your own personal well-being programme

Intuitive operation is one of the criteria that had to be met when designing the remote control. All the input can be entered with just one hand, and all it takes is a click of a button to call up your personal settings.

Mostly touchless

Thanks to the proximity sensor, the WC lid opens and closes automatically, so there is no need for you to do it manually.

Practical and easy to maintain

From the easily removable WC seat and lid to the automatic descaling programme, Geberit AquaClean shower toilets are specifically designed to be cleaned and maintained with minimal effort throughout their long service life.

Design and comfort

Virtually unbeatable in terms of comfort and sophistication, the new Geberit AquaClean Mera is elegant and gives the impression of weightlessness. Years of experience, wide-ranging technical expertise and extensive knowledge of customer requirements have all been incorporated into the development of this latest shower toilet.

Geberit AquaClean Mera

A masterpiece of function and design.

The new Geberit AquaClean Mera is the epitome of timeless elegance. Created by London-based designer Christoph Behling, the new compact shower toilet blends harmoniously into any bathroom environment. The Geberit AquaClean Mera is characterised by high-quality materials, smooth lines and seamless transitions.

This shower toilet doesn't reveal much at first glance: all of the power and water supply connections are incorporated into the housing. The chrome surface on the design cover creates an impression of floating, accentuated by the play of reflections.

The WC lid opens automatically as you approach it, so there is no need to do it manually. There is also an innovative hybrid hot water system consisting of a combination of a continuous flow heater and a storage water heater. This makes it possible to quickly supply a sufficient amount of water at body temperature.

WhirlSpray shower technology
The patented WhirlSpray shower technology, used here for the first time, features two nozzles and ensures an extremely targeted and thorough clean. This is made possible by a pulsating shower spray that is enhanced by dynamic aeration. The benefits are impressive: a more efficient clean and a pleasant shower experience with reduced water consumption.

TurboFlush technology

The innovative TurboFlush technology, based on the asymmetrical inner geometry of the rimless ceramic pan developed by Geberit, enables the toilet to be flushed out extremely thoroughly and quietly. This is achieved with just a single water release point which provides optimal flush water flow guidance. The high-quality ceramic pan is finished with a special surface coating to prevent any build-up of dirt. Inaccessible areas are kept to a minimum, while edges and corners have been dispensed with completely.

Geberit AquaClean Mera

A masterpiece of function and design.

↑ The new Geberit AquaClean Mera shower toilet is available with a white or chrome-plated cover and offers an abundance of comfort functions.

-  WhirlSpray shower technology with five adjustable shower pressure settings
-  Rimless ceramic pan with TurboFlush technology
-  Intuitive and clearly laid-out remote control
-  Orientation light in a range of colours
-  Individually adjustable spray arm position
-  Adjustable water spray temperature
-  Oscillating spray
-  Gently cleaning lady wash
-  WC seat heating
-  Dryer
-  Odour extraction
-  Touchless automatic mechanism for the WC lid
-  QuickRelease function for the WC lid and seat
-  User detection
-  Descaling function
-  Energy-saving function

New

Remote control

The remote control sits comfortably in your hand and is intuitive to use. All the input can be entered with just one hand, and all it takes is a click of a button to call up your personal water temperature, spray intensity and spray arm position settings. You can check other adjustments and profile settings using the display on the back of the remote control and change them via a menu.

Lady wash

The Geberit AquaClean Mera has a separate lady wash, which offers a particularly soft shower spray. Its nozzle is hidden away in the spray arm, keeping it hygienically clean and protected when not in use.

Odour extraction

Automatically activated, low-noise odour extraction eliminates unpleasant odours right where they come from: inside the ceramic pan. The air in the ceramic pan is purified by a long-lasting ceramic honeycomb filter.

Dryer

The dryer arm automatically aligns itself with the last position of the spray arm to ensure an optimal drying performance. The intelligent dryer functionality takes into account the change in the skin's sensitivity to heat as it dries.

WC seat heating

The high quality ergonomic WC seat features integrated heating. Thanks to the proximity sensor, the WC seat only starts warming up as you approach it.

Orientation light

This discreet light attracts attention – and serves as a guide at night. The atmospheric LED light beam, which is activated by the proximity sensor, shines in one of seven individually selectable colours and five levels of brightness.

Geberit AquaClean Sela

A new dimension in cleanliness.

Created by designer and architect Matteo Thun, the Geberit AquaClean Sela fits into virtually any bathroom environment thanks to its clear, simple design. This shower toilet cleans you with a gentle, airy water spray at body temperature. The intensity can be adjusted to one of five levels, while the oscillating spray arm provides a particularly beneficial clean. The intelligent shower function technology and the power supply and water connections are integrated into the ceramic pan, making them invisible.

The Geberit AquaClean Sela is available as a wall-hung or a floor-standing solution to suit any bathroom concept. Both versions come with a remote control and an impressively ergonomic and exceptionally comfortable WC seat.

Wall-hung

Floor-standing

-  Five adjustable shower pressure settings
-  Intuitive and clearly laid-out remote control
-  Individually adjustable spray arm position
-  Oscillating spray
-  SoftClosing and SoftOpening function
-  QuickRelease function for the WC lid and seat
-  User detection
-  Energy-saving function

The simplest way to a new feeling of freshness.

Even if you're not looking to replace your entire WC, you can still treat yourself to the comfort of a shower toilet. Geberit offers the ideal solution for transforming your existing WC into a modern shower toilet in just a few steps. The practical Geberit AquaClean enhancement solutions can be fitted quickly and easily onto most standard ceramic pans. Only the WC seat is replaced; the ceramic pan is retained.

As with all Geberit AquaClean models, when it comes to upgrading your WC, you can choose from a range of enhancement solutions from simple to multifunctional. And if you would like to go another step further in improving the comfort of your WC, Geberit also offers all enhancement solution models in combination with stylish, matching ceramic pans.

Always a perfect match. Solutions for every building scenario.

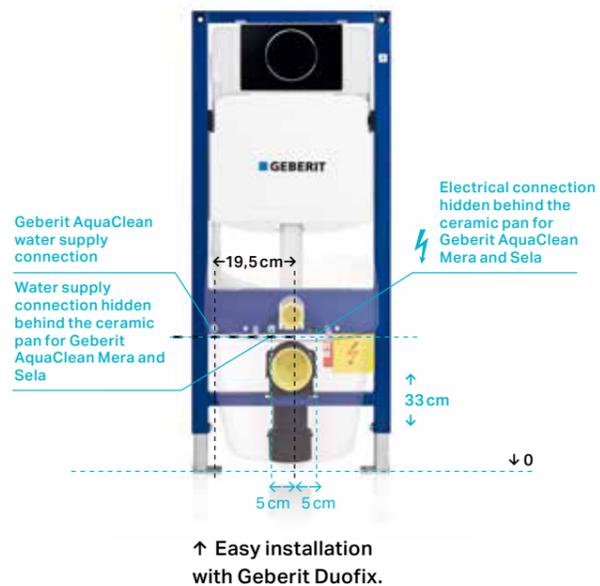

You don't have to go to great expense to incorporate maximum comfort into your bathroom. Whether you are fitting out a brand new bathroom or renovating an existing one, Geberit AquaClean shower toilets can be combined with all Geberit installation and flushing systems.

A sophisticated approach to bathroom design: the Geberit Monolith sanitary module
Sometimes it is just not possible to conceal the cistern behind the wall – either due to time, budget or the basic structure of your home. In these cases, the Geberit Monolith sanitary module for WCs offers an attractive and smart alternative. The front of this sanitary module, which has won numerous awards for its design, is made out of white, black or umbra-coloured glass. Hidden behind it is an ultra-slim cistern and all the necessary sanitary technology. The modules are designed to be mounted quickly and with minimal disruption and existing water and drainage pipes can be used.

↑ Geberit Duofix for wall-hung WCs features a concealed cistern and offers a tried-and-tested solution for bathrooms of all sizes. All the necessary fitting points are planned in advance, so connecting any AquaClean model to water and power supply is quick and easy.

Smart design solutions. Comfort starts with installation.

The Geberit Monolith Plus version offers extra comfort features, including effective odour extraction with a long-lasting ceramic honeycomb filter, an individually programmable LED orientation light and soft-touch operating buttons. This model is particularly suitable as an upgrade for a floor-standing Geberit AquaClean Sela shower toilet. With matching Geberit Monolith sanitary modules available for the washbasin or bidet, bathrooms can be furnished in a thoroughly modern style creating a harmonious look.

Quality products for life. More good reasons to choose Geberit AquaClean.

Geberit has regularly been awarded top marks for sustainability, and we take care to promote environmentally friendly production and products. All products are continuously optimised during the development stage with regard to their eco-friendliness, efficient use of resources and durability throughout their entire life cycle.

Ensuring the quality and safety of its AquaClean models is Geberit's top priority, which is why its shower toilets fulfil all the relevant European requirements including the drinking water standards EN 1717 and EN 13077.

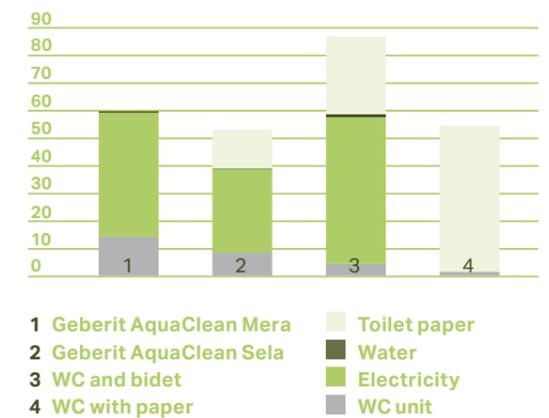

Geberit only uses high-quality materials, such as duroplast for the WC seat and ASA for scratchproof, non-fading visible parts. Geberit offers its end customers a two-year warranty as standard, starting from when the product is installed. During this period, it will replace faulty parts free of charge. Provided that the product has been installed by a professional and registered with Geberit within 90 days of installation, we will extend the warranty by a further year for defective parts. Useful information on warranty registration can be found at www.geberit-aquaclean.co.uk Geberit also offers guaranteed spare parts availability for all components for a minimum of ten years.

European market leader
Geberit is currently the leading provider of shower toilets in Europe and boasts over 35 years of experience in developing and manufacturing these sanitary solutions.

The company has its own research and development facilities in Switzerland, Germany and Sweden and now markets Geberit AquaClean products in 13 European countries.

Sustainable products. For sustainable construction.
In terms of environmental footprint, Geberit's shower toilet complete solutions deliver outstanding results and are comparable with conventional toilets requiring the use of toilet paper. Compared to the consumption of paper, the additional water used by a shower toilet is only a minor factor, whereas the production of toilet paper and the power this consumes play a more significant role. Geberit AquaClean products allow users to save more energy by individually adjusting the product settings, thus reducing their environmental impact even further. In standby mode (economy mode), all Geberit AquaClean models consume no more than one watt of energy – or even 0.5 watts in the case of the Geberit AquaClean Mera. All Geberit AquaClean models come with an economy mode and comply with the European Ecodesign Directive.

Geberit AquaClean Mera and Sela in comparison with conventional toilets with toilet paper and bidets

The graph shows the environmental impact estimated using the IMPACT World+ method.

We make you happy. Top customer satisfaction.

We have put a smile on the faces of more than a million customers with our shower toilets and we aim to continue doing so. Every day, we carry out research and develop products with your comfort in mind – and our efforts are paying off: over 80% of our customers would recommend Geberit AquaClean.

Would you like to make an appointment for a consultation or simply try out our products to see how comfortable and efficient they are?

“The Sela toilet has been a particular hit with our 11-year-old son. Now he loves using the toilet in the en-suite and I can be confident that he’s always clean between showers!”

Komal Passi, from West Yorkshire

“When you use it, there is nothing else like it – you feel clean and fresh, and using water to clean feels so much nicer on your skin than toilet paper.”

Michael Leigh, from Blackpool

“After suffering with Carpal Tunnel and noticing the mobility in my hands decreasing, I’ve realised it is easy to take everyday tasks for granted. However, since we had our Geberit AquaClean installed a couple of months ago it has been a revolution for both my husband and I.”

Fulvia Schiff-Gent, from Manchester

“We’d never really considered having a shower toilet before, but now we’ve had it for a few months, it’s wonderful and we’ve had no problem at all! Should we ever choose to move house in the future, we will take the AquaClean with us!”

John Flint, from Stockport
