LIFESTYLE.

HANSA – THERE IS MORE TO IT.

Excellent product quality is created when every detail is considered important, is well-thought-out, offers noticeable benefits. At Hansa, this is evident due to the many technical characteristics and special features that make every single fitting unique. To make it easy for you to find the most important arguments, we have represented these in the form of pictograms for each range of fittings. At least one product of this series has the allocated characteristics.

Ecology:

Flow limitation, saving and comfort zones, and other, in some cases, individually adjustable options for optimising water and energy consumption.

Ecology:

Consumes up to 50 % less water and energy* due to individually adjustable water saving functions.

Restriction of the flow rate to 9 l/min (indicated by the product) and intelligent stream formation ensure optimised water consumption with full comfort.

Comfort:

Features that make operation of the fitting and use of water easier and particularly pleasant.

Comfort:

Particularly silent. Fitting fulfils the strict conditions under noise protection class 1.

More flexibility thanks to changeable or detachable spout.

Precise operability thanks to limited swivel radius of the spout.

Flexible usability thanks to free swivel radius of the spout.

Surface finishes are available in various colours and materials.

More range and functional plus thanks to a single or multi-spray pull-out shower.

Health:

Water quality must fulfil high demands. We preserve it by the use of special materials and ensure optimum hygiene.

Health:

WATER SAFE. Hitec functional core. Preserves water quality.

Brass in contact with drinking water contains less than 0.3% lead.

Surfaces in contact with drinking water do not have a nickel coating.

Safety:

Handling water should give pleasure. Our fittings offer reliable product characteristics for long-term safe operation.

Safety:

Valve for shutting off the water inlet for a dishwasher or washing machine at the fitting.

Technology:

Product characteristics that may be crucial for the suitability of the individual planning situation.

Technology:

Low-pressure fitting – for accordingly designed systems.

* in comparison to a conventional two-handle mixer

THE PHILOSOPHY, THAT GUIDES US COMES TO LIGHT IN EVERYTHING WE DO.

QUALITY WITHOUT COMPROMISE

HANSA supplies the best quality in the market: a commitment that we have set ourselves and is the standard on which customers base their evaluation.

HANSA translates its passion and precision into reality – with products whose design, material, finish and technology continue to set new benchmarks.

And we offer services for the benefit of all our market partners. Regardless of when, where and why we are needed, We offer a comprehensive service which starts with the planning stage, includes the joint development of effective solutions and continues even after you have taken delivery of your product.

AN ESTABLISHED INDUSTRY LEADER

HANSA has been active in this field for more than 100 years and is one of the leading companies in the industry. Success over such a long period is no coincidence but the result of commitment, experience and consistently sustainable company development.

AWARD-WINNING SPECIALIST TRADE PARTNER

A special award proves how well we fulfil these high requirements: in 2012, the readers of "markt intern", the business information service for German plumbing specialists, voted HANSA the "No. 1 specialist trade partner" for the 18th time in a row.

This vote of confidence in the plumbing fittings sector obviously also applies to kitchen fittings and all our other product ranges: HANSA is the partner you can rely on.

EXPERIENCE WATER

The HANSA brand stands for the idea to give form not just to the fittings but to water. An idea that hits home wherever there is water: around the world, beyond borders and geographies, in every area of life and work. We therefore always strive to create the perfect unity of design and functionality. This is reflected in our bathroom and kitchen fittings that are as functional as they are fascinating, thus making it possible to both utilise and experience water.

WE TREASURE WHAT INSPIRES US. HOLISTICALLY. SUSTAINABLY.

SUSTAINABILITY AS A COMPANY PRINCIPLE

We have a special sense of responsibility for the precious resources with which we work on a daily basis. The basic principle of sustainability has always influenced our way of thinking and working, as well as all our products and production processes. We do not focus on individual steps, but rather on cycles, and always have the entire life cycle of a product in mind. We attach great importance to timeless designs that have their own style and do not follow the latest trends.

WATER PERFORMANCE

We understand products as the perfect combination of design and functionality. What is visible in front of the wall must be just as convincing as what is hidden inside the fitting or behind the wall. We are able to achieve this goal by combining a variety of skills. Each HANSA fitting is made up of the latest technology, recognised design skills and last but not least the excellent craftsmanship of our designers and engineers.

The end products are highly functional and provide added emotional value within the overall effective design.

GREEN RESPONSIBILITY

The "Green Responsibility" label guarantees modern, ecologically sound HANSA technology, ensuring minimal water and energy usage and adherence to strict international guidelines.

INNOVATIONS FOR MORE COMFORT

HANSA is an industry trendsetter. Modern materials, progressive concepts for hidden and exposed products, new technical solutions that help to save water and energy: over the years, we have often been the first to launch important innovations. HANSA holds numerous national and international patents. This clearly illustrates the sustainable approach that drives us forward.

RESPONSIBILITY AND RESPECT

HANSA works exclusively with high-grade, durable materials, for example the dezincification-resistant brass MS 63, plastics with the German KTW and in many products the Water Safe Hi-tec functional core for maintaining existing drinking water quality.

The HANSA**PROTEC** system achieves a level of safety that goes beyond the legal requirements – while ensuring carefree and pure enjoyment.

WHEN WE REFER TO
"PURE WATER",
WE MEAN IT LITERALLY.

HANSAPROTEC: SAFEGUARDS THE QUALITY OF YOUR DRINKING WATER

Water in the kitchen is crucial for drinking, cooking and hygiene. It is therefore all the more important that we guarantee the high quality of your drinking water and help to put your mind at ease. Our new kitchen fittings from the HANSAPROTEC system play a valuable role in this. Firstly, HANSAPROTEC means: the high-grade, dezincification and corrosion-resistant brass alloy MS 63 is used for all water-bearing parts. But that is not everything: all brass parts which come into contact with drinking water have a lead content of less than 0.3 % and do not have a nickel coating. This means that HANSA products are well below statutory limits! The applied plastics comply with the German KTW (plastics in contact with drinking water) and further safeguard the high quality of your drinking water. Your drinking water remains safe and clean at all times. And because it is such a precious resource, all our fittings are designed for the most economical use of water. All the new HANSA kitchen fittings help to reduce water consumption to an eco-friendly 9 l/min.

INSTEAD OF
OFFERING
EVERYONE
EVERYTHING.
WE OFFER
EVERYONE THE
RIGHT THING.

HANSA|LIVING

VERSATILE KITCHEN CONCEPTS

- The characteristic **HANSA|LIVING** series meet unique aesthetic and functional demands.
- Various series designs and versions – e.g. with pull-out showers and side operation – enable the realisation of bespoke practical solutions.
- **HANSA|LIVING** series offer optimum functionality and perfect comfort.
- High-quality materials and innovative technologies guarantee maximum safety and drinking water hygiene.

HANSA|HOME

CLASSIC KITCHEN FITTINGS

- Thanks to the ultra-modern functions, the **HANSA|HOME** series focus on the core products for classic kitchens.
- The programme includes a wide selection of proven, universal range of fittings with traditional and modern design elements.
- All the **HANSA|HOME** series combine comfort of use with top HANSA quality.
- High-quality materials ensure maximum safety and drinking water hygiene.
- A hot water stop offers additional safety with protection against scalding.

HANSAI

MODERN
EXPRESSIVE
INDIVIDUAL

FASCINATINGLY BEAUTIFUL. EXTREMELY PRACTICAL. HANSADESIGNO.

HANSADESIGNO really justifies its name – as it is in a technical class of its own: the delicate body with an elegantly curved, high spout, with fine harmony in the form transitions and precisely executed details. But HANSADESIGNO can do a lot more than just look pretty. Maximum flexibility due to the 360° swivel spout, ease of cleaning thanks to the minimum clearance and a hidden spray regulator mean it is just as functional as it is stylish. With the extremely successful combination of aesthetics and functionality, modernity and lasting value HANSADESIGNO is and remains an iconic role model.

A special lever mechanism and small clearances help to significantly reduce the amount of required cleaning for HANSADESIGNO.

Twice as practical: the tall, swivel spout of the HANSADESIGNO series facilitates work at a sink. The distinctive pin lever allows you to regulate the temperature and quantity of water accurately and smoothly.

ENJOYMENT AT THE HIGHEST LEVEL. HANSALIGNA.

There is more to food than just the taste. And there is more to cooking than a recipe. If this is what you believe, HANSALIGNA offers a kitchen fitting designed to your taste and requirements. Thanks to its technical perfection, HANSALIGNA proves to be all-round value: ample space for pots and pans due to the high, 150° swivel spout, a high level of user friendliness and eco-friendly water consumption of just 9 l/min. Furthermore, the fitting is equipped with the HANSAPROTEC system to ensure your health and safety. The rational arguments are sufficiently convincing!

HANSALIGNA captivates not only your mind but also your senses: with elegant shapes, clear designs, first-class materials. Beautiful appearance combined with perfect functionality – resulting in exceptional enjoyment.

Clever design: a side-mounted operating lever not only looks extravagant – it is also very practical. The fitting always looks good, as water cannot drip from your hands onto the spout during operation.

The geometry of good style: HANSASTELA masters it. Completely different, but always clear forms like rectangles and circles are combined to create an unpretentious, distinct language of shapes. There is no way to "hide" sophisticated functionality in a simpler and more beautiful manner.

The slender, modern pin lever is unmistakable. It ensures simple yet precise use of HANSASTELA.

A STYLE STATEMENT: HANSATELA.

What a magical performance: HANSATELA is the logical connection of classy design and consistent pragmatism. The wide, strictly geometric spout not only defines the style of the fitting but also its functionality. For greater flexibility, the spout can be swivelled by 150°. Measuring a generous 281 mm in height, it allows even high pots and vessels to be filled without difficulty.

The top-operated HANSARONDA with swivel spout is alternatively available with a pull-out shower. A detachable special version is also available – extremely practical when HANSARONDA is, e.g., to be installed in front of a window.

EXCITINGLY VERSATILE: HANSARONDA.

Good cooking is only possible when everything is perfect, from the selected ingredients to the professional equipment. And the same applies to HANSARONDA, whose perfection comprises a combination of various factors. It is the design that initially appeals to the eye: HANSARONDA is available as a classical and proven top-operated fitting or with a side-mounted operating lever. The versions allow you to integrate HANSARONDA into various room and furnishing concepts. It is possible to suit all your individual tastes and requirements with just one series. The two versions not only offer an impressive appearance, but also enhance convenience. HANSARONDA offers sufficient space for bulky pots and pans and is quick and easy to use.

A SOUND DECISION: HANSARONDA.

Relaxation you can enjoy with a clear conscience. HANSARONDA is therefore equipped with the new HANSAPROTEC system – for maximum safety and enjoyment of your drinking water. HANSARONDA also has a special sense of responsibility for precious resources: the water flow rate is just 9 l/min.

Luckily, the range of clever and highly practical pull-out showers has not been reduced but extended for HANSARONDA: the range offers the ideal solution for every application and situation.

Flexible: a smooth action pull-out shower is integrated in the swivel spout of the side-operated HANSARONDA. This allows you to also fill containers next to the sink.

The top-operated HANSARONDA is available with (fig. below left) or without (fig. above) a pull-out shower (fig. below left). The water spray strength can be adjusted from soft spray to powerful needle spray – depending on the object you wish to rinse or clean.

The side-operated version of HANSARONDA with pull-out spout is also available with a hand shower that can be switched between soft and needle spray.

INNOVATIVE MULTI-TALENT: HANSAFIT

Thought-out to the smallest detail: HANSAFIT has two ergonomically designed, easy-grip levers with soft-touch surface finish via which you can easily adjust the flow rate of cold and hot water. The tall spout of HANSAFIT can be swivelled up 120° in adjustable steps. This provides ample space for pots and pans. Additional contactless sensory operation ensures the automatic control of pre-tempered water – ideal, e.g., for occasionally washing hands, ensuring optimum hygienic conditions. The water running time can be freely selected in various steps. The temperature is preset via the anthracite-coloured ring and shown in the display. The temperature display issues a warning if the water is too hot, thus ensuring optimum safety.

Extra comfort: The water temperature can be preset via adjusting ring for the contactless operation. The display always indicates the current temperature and warns of temperatures above 42°C.

Reassuringly safe: The electronic appliance shut-off valve (optional) only supplies water during the selected time period and closes automatically.

HANSAFIT: Hygienically flawless and also available with appliance shut-off valve.

HOME

TRADITIONAL,
PRACTICAL,
UNIVERSAL

Classic design and reliable functionality: HANSAMIX with a swivel spout.

The pull-out hand shower boasts a flexible and robust metal hose, which allows you to pull the shower head to wherever you need water. The two HANSAMIX standing fittings are also available with an appliance shut-off valve.

AT THE HEART OF EVERY GOOD KITCHEN: HANSAMIX.

All around flexibility: HANSAMIX as a wall-mounted fitting with a 120° swivel range.

HANSAMIX is one of the best known and most successful HANSA kitchen fittings. With its timeless elegance and proven components that are constantly refined with state-of-the-art technology, it is still considered to be the standard for functional kitchen fittings. HANSAMIX has stood the test of time and is still as popular as ever: As a fitting with HANSAPROTEC system mounted on the sink you can enjoy your drinking water with the peace of mind that comes with knowing it is in safe hands. The high-grade chrome, ease of use and the clever functional details ensure that HANSAMIX will become a classic in your kitchen, too.

DESIGN FOR EVERYDAY USE. BUT NOT ORDINARY IN ANY WAY: HANSAPRADO.

Kitchens can often be busy and hectic environments, demanding the most from the respective fittings. HANSAPRADO is a tried-and-tested solution that is able to keep pace without a hitch. Its ease of use is of particular advantage when the heat is on. The long spout can be freely swivelled 360° – making it flexible and practical while creating the necessary space for daily kitchen use. HANSAPRADO is simple, reliable – and not the slightest bit resentful: its robust surface finish can be cleaned quickly and efficiently, even if the cooking process got a bit out of hand.

Adaptable: the linear design of HANSAPRADO fits in with both modern and traditional kitchen designs.

FRESH AND CLEAR ELEGANCE: HANSAFORM.

Headstrong and very independent: this is how HANSAFORM. The soft flow of water is a complete, yet attractive contrast to the clear, angular shapes! The long lever is very user friendly and allows precise operation. The ample space for pots and pans ensures even greater comfort. The high quality of the finish makes it look exceptionally good. The long swivel spout is robust and cast in one piece; the HANSAPROTEC system guarantees the longevity of the fittings and safeguards your drinking water. All water-bearing parts are made from high-grade, durable materials to maintain existing quality of your drinking water. For example, the dezincification-resistant, corrosion-free brass MS 63, which has a lead content of less than 0.3% and is not nickel coated on parts that come into contact with drinking water, and plastics with the German KTW in the WATER SAFE Hi-tec functional core.

HANSAFORM is also available as a version with an appliance shut-off valve for even greater safety protection.

The distinctive features of HANSAFORM fit perfectly into well-designed and highly functional kitchens – or create a visually stimulating design in cosier environments.

SEE. TOUCH. RELISH. TRUST: HANSADISC.

HANSADISC is appealing as well as satisfying. With its specific body and long, softly curved lever it is a fitting whose elegant flowing shape is as easy on the eye as it is on your hands. Reassuring to know – and yet another reason to trust HANSADISC: as a fitting equipped with the HANSAPROTEC system, it guarantees healthy and carefree drinking water enjoyment. The optionally available version with appliance shut-off valve provides an additional safety feature. Pragmatic benefits, such as the robust, easy-to-clean surfaces and 150° swivel spout, all add to the good impression.

Regardless of whether the kitchen unit is located in front of a wall or in the middle of a room: the exceptional lever ensures that HANSADISC is a real eye-catcher.

EVERY BIT AS CLASSY AND ELEGANT AS A CONTEMPORARY KITCHEN: HANSATWIST.

Size does not determine the usefulness of a fitting! With its small, robust brass body and its slender, cast spout, HANSATWIST appears graceful and serene, but actually it provides some much needed support in the kitchen. Particularly important: thanks to the HANSAPROTEC system, the fitting plays a key role in safeguarding the high quality of your drinking water. It is not just the aesthetic appeal but also the comfort rich functionality of the smooth operating lever which allows you to regulate the water quantity and temperature precisely with both versions. Adding depth and interest to a contemporary kitchen: that is HANSATWIST.

Simply beautiful: HANSATWIST with a high-quality solid lever is convenient to operate, providing an elegant and discretely tasteful feel. Seeing as its design is so laid back, HANSATWIST is the ideal combination partner: compatible with numerous furnishing solutions, to suit your style.

Extra comfortable: HANSATWIST with a lever loop shape is not only visually striking but is also particularly pleasant to touch. Offering you a distinctive advantage when it comes to ergonomics and ease of use. HANSATWIST with a lever loop shape provides long-lasting pleasure, regardless of which generation you belong to.

Much more than just an attractive design: HANSATWIST combines look and style with modern features and outstanding comfort.

ALWAYS A GOOD CHOICE: HANSAVANTIS.

Very elegant at the rim of the sink: the slim, linear outer design of HANSAVANTIS is a direct expression of a sophisticated lifestyle. Its elegant simplicity and the clear, cylindrical forms make it a classic in modern kitchen culture. Thanks to the two lever versions – a solid metal lever and a distinctive pin lever – it perfectly emphasises the respective style of the kitchen. Just as charming as it is practical: the side-operated HANSAVANTIS STYLE. Thanks to its high, 150° swivel spout, it is perfect for practical tasks, like filling high receptacles in a stylish and elegant manner.

Equipped with the HANSAPROTEC system, HANSAVANTIS guarantees the high quality of your drinking water and helps to put your mind at ease.

The solid lever version of HANSAVANTIS is a timeless classic.

Graceful, stylish and simply elegant:
HANSAVANTIS with slender pin lever

The HANSAVANTIS version with appliance shut-off valve offer additional safety in case appliances, e.g. a dishwasher, are connected to the cold water pipe.

With HANSAVANTIS STYLE the characteristic slender pin lever is located at the side – for even greater space for hands and pans underneath the spout.

No need to be hidden from view: HANSAPINTO is a delight to use with its awesome looking design and sustainable product concept.

MODERN LOOK. TRADITIONAL VALUES: HANSAPINTO.

Taking a back seat is not in its nature. With its distinctive lever, clear geometrical shapes and bold angular lines, HANSAPINTO is a real eye-catcher. It is particularly at home in a modern and fresh kitchen design. But not only its design is contemporary: Water and energy consumption can be reduced, if required. Moreover, due to the high-grade chrome of the solid metal body, the detailed, high-quality design and, in particular, the HANSAPROTEC system for maintaining existing drinking water quality, HANSAPINTO will provide you with enjoyment for many years to come.

Quality in the detail: Solid metal lever, dezincification-free brass body and a high-quality assembly technique preserve the value of your HANSAPINTO.

Looks good and is fun to use:
HANSAPRIMO with its elevated
swivel spout (fig. above).
If other appliances, e.g. a
dishwasher, are connected to the
cold water pipe, the
HANSAPRIMO version with
appliance shut-off valve offers
additional safety (fig. right).

WITH THE GREATEST PLEASURE: HANSAPRIMO.

In terms of the design, quality and practical value: HANSAPRIMO is a feel-good fitting. Its design has an all-round positive effect with the flat lever and the long swivel spout, whose upward movement makes a bold style statement. The robust materials, the high-quality finish and the ultra-safe internal components are also a joy to use: to ensure ultimate drinking water quality HANSAPRIMO is equipped with the HANSAPROTEC system.

Everything is just fine! HANSAPRIMO always leaves a good impression.

KEEPS YOUR KITCHEN YOUNG: HANSAPOLO.

HANSAPOLO is a fitting that you will like immediately – and will continue to do so for many years to come. This is down to the fresh and pleasing design, but particularly also as a result of the exceptional HANSA quality: from the robust body made from dezincification-resistant brass MS 63, through the high-quality lever to the HANSAPROTEC system for ideal drinking water hygiene. Like all Hansa fittings, HANSAPOLO has a high-quality and easy-to-clean chrome finish – an advantage that ensures a youthful shine even after many years of use.

The sum of its benefits ensures the experience: The version with appliance shut-off valve offers additional comfort and safety.

The traditional yet exciting features of HANSAPOLO are simply amazing, without being the centre of attention.

Despite its compact size, its price-performance ratio is second to none: HANSAPICO, you just have to love it!

SMALL BUT FULL OF CHARACTER: HANSAPICO.

HANSAPICO exudes a sense of serenity. And this not only applies to its carefree, cheerful and positive nature! HANSAPICO makes it easy to enjoy your kitchen: the materials, technology and finish are – as with all HANSA products – dependable, robust and durable. As the charming fitting is equipped with the HANSAPROTEC system, there is no need to worry about the quality of your drinking water. And if you are looking to find all these benefits at a favourable price, HANSAPICO is the right choice for you.
